ABOUT ME

I am a recent system developer graduate with a passion for software development and data science. I have a strong foundation in programming concepts and am proficient in several programming languages including Java, flutter, and Python. I am also familiar with software development methodologies such as Agile and Scrum. I am eager to apply my skills and continue learning on the job as an entry-level software developer. I am a fast learner and I have strong problem-solving skills, I also have good verbal and written communication skills. In addition, I have completed several projects during my studies that have helped me to improve my software development skills. I am an energetic, hardworking, and ambitious individual who has developed a mature and responsible approach to any task or situation that I am presented with. I excel at collaborating with others to achieve a specific goal on time and with excellence. I am always eager to learn and share my knowledge.
